

## If Using Your Phone's Translation Functions:

This section describes one of the translation procedures for each of the major smartphone systems.

Please confirm the translation method for your device.

### iPhone

Using Safari, go to the webpage or website that you want translated.

Tap the “a A/ああ ●●” icon in the address bar and select “Translate to ●●/●●語に翻訳” to translate the site into the selected language.

### Android

Using Chrome, go to the webpage or website that you want translated and Chrome should automatically present you with its translation toolbar/翻訳ツール.

If the Translation Tool doesn't appear, in Chrome, go to the 3-vertical-dots menu in the top-right and select Translate.../翻訳.

The translation toolbar is arranged as follows: Page Language, Language to Translate to, Menu (3 vertical dots), and close button (x).

If you wish to translate into a different language, please select that language from the browser menu.
